Conference organizers are currently accepting abstracts for consideration. Please submit abstracts of original experimental and theoretical investigations in all areas of welding, but not limited to the following areas:

- Friction Stir Welding
- Microstructure
- Phase Transformations
- Properties and Structural Integrity of Weldments
- Residual Stress and Distortion
- Sensing, Control and Automation
- Solidification
- Transport Phenomena
- Weldability
- Welding Processes, Procedures and Consumables
- Other Experimental/Modeling Investigations

Plan now to be part of this exciting conference.

**Abstract Deadline:** September 1, 2011

For more information and to submit your abstract, visit [www.asminternational.org/trends](http://www.asminternational.org/trends).
